PROJECT: ER-NH-0003-01(108) / 104569306 &
ER-NH-0003-01(108) / 104569308 -- Harrison County

The Bidder's Attention is hereby called to Subsections 105.06, Cooperation With Utilities, & 105.07, Cooperation Between Contractors, of the 2004 Edition of the Mississippi Standard Specification for Road and Bridge Construction.

This project adjoins projects ER-BR-0003-01(099)/104556301 & 302 & ER-NH-0003-01(106) / 104569304 in the county of Harrison, which will be in progress. The MDOT Contractors and Utility Contractors shall cooperate with each other and with the Department during construction of the adjoining projects to avoid mobilizing in an area that would result in a conflict.

Bidders are advised that there will be utility restoration work within the limits of this project. Contractors shall closely coordinate their work schedule with the Utility Contractors and/or the City through the Project Engineer to avoid mobilizing into an area that would result in a conflict. In the coordination efforts, the MDOT Contractors may be required to shift their operations to another location or suspend operations due to the utility restoration which must be accomplished prior to the full restoration of US 90 and to avoid performing work that may be damaged by one of the other contracts.

Validity of time extensions will be assessed based upon coordination efforts with all Contractors involved and availability of other areas to perform the desired operation(s).

Any delays due to activities of Utility Contractors performing hurricane restoration will not be grounds for any type of monetary compensation.

Utility permits/plans are available for viewing at either the Lyman Project Office or the District Office. Mr. Anthony McFarlin at (228) 832-0277 is the contract person regarding utility permits/plans. **Bidders are advised that they shall be required to review the utility documents/plans and complete the attached certification in order to bid this project.**

The successful bidder shall familiarize themselves with the existing and pending utility contracts referred to above and comply with the provisions of Subsections 105.06 & 105.07 of the Standard Specifications.

SPECIAL PROVISION NO. 907-237-1

CODE: (SP)

DATE: 04/11/2006

SUBJECT: Wattles

Section 907-237, Wattles, is hereby added to and made a part of the 2004 Edition of the Mississippi Standard Specifications for Road and Bridge Construction as follows.

SECTION 907-237 - WATTLES

907-237.01--Description. This work consists of furnishing, constructing and maintaining wattles for the retention of soil along the toe of fill slopes, around inlets, swale areas, small ditches, sediment basins and other areas as directed by the Engineer in accordance with the requirements shown on the plans and these specifications. Also, the work includes removing and disposing of the wattles checks and silt accumulations as directed by the Engineer.

Measurement and payment for wattles will be made only when ordered and a pay item is included in the bid schedule of the proposal. The quantity is estimated for bidding purposes only and will be dependent upon actual conditions which occur during construction of the project.

907-237.02--Materials. Wattles shall have a minimum diameter of eight inches (8") and a length adequate to meet field conditions. The stakes used in securing the wattles in place shall be placed approximately four feet (4') apart throughout the length of the wattle. Stakes shall be wooden and of adequate size to stabilize the wattles to the satisfaction of the Engineer.

Wattles shall be one of the following, or an approved equal.

1. Ultra-StormWattle by Ultra-Tech International, Inc., 1-800-353-1611, www.spillcontainment.com/index.htm
2. Straw Wattles by California Straw Works, Inc., 1-916-453-1456, www.strawwattles.com
3. Earth Saver Wattles by Earth Saver Erosion Control Products, Inc., 1-800-WATTLES, www.earth-savers.com

907-237.03--Construction Requirements.

907-237.03.1--General. The wattles shall be constructed at the locations and according to the requirements shown on the plans, or as directed by the Engineer. Wattles required along the toe of fill slopes shall be constructed prior to grading operations at the site. For other locations, the wattles shall be constructed when directed by the Engineer.

The soil shall be excavated at least three inches in depth to embed the wattle. After securing in place, a sufficient quantity of the excavated material shall be placed around the wattle and compacted to prevent undermining.

907-237.03.2--Maintenance and Removal. The Contractor shall maintain the wattles and remove and dispose of silt accumulations as directed by the Engineer.

When the wattles are no longer needed, they shall be removed and the Contractor shall dispose of silt accumulations and treat the disturbed areas in accordance with the contract requirements.

907-237.04--Method of Measurement. Wattles will be measured per linear foot.

907-237.05--Basis of Payment. Wattles, measured as prescribed above, will be paid for at the contract unit price per linear foot, which price shall be full compensation for installation, maintaining and removal of the wattles, the removal and disposal of silt accumulations and any required restoration of the disturbed areas.

Payment will be made under:

907-237-A: Wattles

- per linear foot
