

**Call 07 Overlay approximately 3 miles of SR 501 from I-20 to the RR Crossing in Forest, known as State Project No. MP-5501-62(006) / 304356301 in Scott County.**

- Q1. Is the contractor going to be expected to do Construction Staking on this project?
- A1. No. MDOT will provide the Construction Staking for this project.
- Q2. The Scope of Work states that traffic will not be allowed on the milled surfaces. Does this mean the side streets & tie ends too or just the mill and inlay sections?
- A2. The milling restriction will apply to the mainline only. However, if the contractor chooses to mill the side streets and delay paving, they assume responsibility for any failures or damage that might occur.
- Q3. Addendum #2 moved the relocation of water line to pay item 265-PP002. Does pay item 613-A001 require any adjustments other than riser rings for man holes and water valves?
- A3. The 613-A001 item should only apply to manholes and water valves.
