

**Call 12 5 Lane Construction for approximately 1 mile on SR 305 from US 78 to Goodman Road, known as Federal Aid Project No. STP-0031-02(003) / 101427301 in Desoto County.**

Q1. The proposal has no temporary tape set up but there is temporary tape shown in the plan quantities in the phase sections. Will temporary tape be used on this job? If yes, will it be added to the pay items in the proposal?

A1. Temporary tape is not intended to be used.

Q2. 1. Where is the cost of demoing the existing traffic system to be covered? Traffic control? 2. Where is the cost of the needed 3 conductor cable for the preemption system (beacons and confirmation lights) to be covered? 3. Is there a detail for which the UPS system is to be mounted? 4. Plans call for base mount, but just what is the detail on that? 5. With type 2 poles called for at each intersection, what is the mounting detail on the radio antennas? 6. At Goodman and 305 I see handicap ramps, but no ped heads or push buttons.

A2. 1.) See Note #15 and #24 on plan sheet 2005; Note #13 on sheet 6. 2.) See the fax letter issued for this project. 3.) The contractor should reference the UPS Special provision and project plans 4.) See previous answer in #3. 5.) A detail is not available, but reference project plans. 6.) Pedestrian signal heads and/or push buttons are not required.
