

Call 05 Mill and Overlay approximately 7 miles of SR 3 from Darling to Sledge, known as State Project No. MP-2003-60(008) / 304821301 in Quitman County.

Q1. How will the edge stripe be applied in relation to the rumble strips?

A1. When edge lines are placed over rumble strips, the pavement marking stripe must be applied using the atomization/spray method instead of extrusion/ribbon method. To ensure the proper alignment of the rumble stripes, the Contractor will be required to place a layout line to be followed during installation of the edge lines over the rumble strips.
