

**Call 04 Installing an Intersection Conflict Warning System at Various Locations on US Highway 51 and US Highway 49, known as Federal Aid Project Nos. HSIP-2177-00(012) / 106859301 and HSIP-0008-03(055) / 106859302 in Copiah and Rankin Counties.**

Q1. The plans show multiple runs of #12/5 Conductor Cable supplying Advanced Flasher Assemblies, some of which are directed at the same direction of traffic. Would it be possible to install a single run of #12/3 Conductor to each sign and also, for signs that are facing the same traffic, could a paralleled circuit be run from the first sign to the second to prevent a separate wire from being run all the way from the cabinet.

A1. No
