

**Call 15 Bridge Repairs on six bridges on US 51 between the Pike County Line and US 84 ,  
known as Federal Aid Project No. BR-2175-00(010) / 101840301 in Lincoln County.**

Q1. Do the banks of the creeks get riprap treatment in addition to the encasements?

A1. Yes

Q2. Concerning the required shoring as noted on sheet number 8002. From preliminary discussions with our engineering firm, it appears that a shoring system, that will support the required loads, will be costly to construct therefore, jeopardizing the project budget range. Can MDOT provide the shoring concept estimated for this project?

A2. MDOT cannot provide the shoring concept; however, the proposed budget range has been revised to \$1,000,000 - \$5,000,000.
