

Call 13 Bridge Preservation on SR 44 over the Bogue Chitto River, Bridge No. 5.1, known as Federal Aid Project No. BR-0179-00(020) / 107638301 in Pike County.

- Q1. The notes and call-outs in the drawings (Sheet 8002) specify that all joints are to be sealed. The quantities in the bid items for "Joint Preparation" and for "Bridge Repair, Seal Joints" appear to account for only the joints at the intermediate bents. Please confirm whether or not the currently closed joints at the end bents are to be repaired within this project. The work to bring these joints in conformance with the details in the plans would be significantly different than for the joints at the intermediate bents.
- A1. The joints at the end bents are not to be sealed.
