

Call 21 Bridge Preservation on US 80 over the Pearl River, Bridge No. 46.4, known as Federal Aid Project Nos. BR-7314-00(030) / 1075693010 & 1075693011 in Hinds & Rankin Counties.

Q1. Additional clarification is needed regarding how the quantities for the interior and exterior hanger assemblies will be measured for payment. For example, the bid schedule has 42 each for the exterior assemblies and 105 each for the interior assemblies. However, there will not be 147 total assemblies installed since the exterior hanger assembly also supports one interior beam at each end of the bent (Beam 2 and Beam 6) (See Sheet 8007). Will the contractor be paid by the type of beam supported at each bent or the type of assembly installed because these two quantities are not the same?

A1. See addendum.
