

Call 06 Bridge Repair on MS 25 over I-55, known as Federal Aid Project No. NH-0056-01(102) / 108015301 in Hinds County.

- Q1. The FRP Wrap notes specify that carbon fiber FRP systems are to be used and lists three pre-approved suppliers. Two of the listed suppliers are also applicators, so it's not clear if they will also quote installers that compete with them. The Milliken RenewWrap FRP system meets the requirements for this project. Can this product be used in lieu of one of the listed products?
- A1. See addendum.
- Q2. Sheet 8003, Note #1 in FRP Wrap Notes lists acceptable FRP wrap manufacturers for this project. Will MDOT add "FRP Wrap" as manufactured by Sika Corporation to the list?
- A2. See addendum.
- Q3. Sheet 8003, Notes 12 of FRP Wrap Notes states, "All labor, materials, and surface preparation associated with the installation of FRP wraps, including epoxy mortar repairs, shall be included in pay item 907-824-PP008, Bridge Repair, FRP Wrap." MDOT has included a separate pay item for Epoxy Repair (Item 907-824-PP003). Can MDOT please confirm that epoxy mortar repairs identified in the plans will be paid for under the Epoxy Repair item and will not be subsidiary to the FRP Wrap item as stated in Note 12?
- A3. All epoxy repairs will be paid under pay item 907-824-PP003, Bridge Repair, Epoxy Repair. The reference to "including epoxy mortar repairs" in Note 12 is to be disregarded.
