

Call 12 Seal & Overlay approximately 7 miles of SR 25 from SR 35 to Renfroe, known as Federal Aid Project No. NH-0056-01(101) / 107964301 in Leake County.

Q1. 1.) Is grinding an approved method for removal of traffic stripe? 2.) Does all traffic stripe have to be removed prior to scrub seal application? (rumble strip and center line) 3.) If all traffic stripe is to be removed, will the contractor be paid to place temporary stripe back?

A1. 1.) Yes. 2.) Centerline, edge lines, and other stripes located on the mainline are to be removed prior to scrub seal. 3.) The intent is not to remove all stripe prior to commencing scrub seal operations, but rather to remove the stripe located in the anticipated area of a day's run. If the Contractor chooses to remove all stripe prior to beginning, temporary stripe will be required to be placed, and the cost absorbed. Payment for temporary stripe will only be made where failed area repairs, milling/leveling, scrub seal, or paving is done.
