

Call 15 Bridge Repair on US 51 over Big Black River, known as Federal Aid Project No. NHPP-1681-00(022) / 108151301 in Madison County.

Q1. Can as built plans be made available?

A1. See the below link to the plans:

<https://file-exchange.mdot.state.ms.us/dl/?f=d8ae9123e49fed19bc67e8d190b8dac1d279d1c1>

Q2. 1.) Drawing 73: Shows cross bracing angle but does not give locations. Can you please provide locations? 2.) Drawing 75: Shows the repair plates $\frac{1}{2}$ x 7 x 2'-6". Will these quantities be determined after sand blasting?

A2. 1.) The cross bracing shown is existing. 2.) Yes.

Q3. As per page # 62 of the Proposal & Contract Documents pertaining to the last sentence at bottom of the page, please confirm that all piles and connection angles are to receive a prime, intermediate, and finish coat as opposed to just the repaired piling to receive final two coats.

A3. All piles, connection angles, and designated piles to be repaired shall receive a prime, intermediate, and final coat. Additional abrasive blasting will be required after the designated piles are repaired.

Q4. The proposal states there is a platform system already in place. At the pre-bid site visit there did not seem to be platform system in place. Can MDOT advise?

A4. The platform system has been removed.
