

Call 02 Bridge Preservation on US 49 over the Biloxi River (Bridge No. 13.8A), known as Federal Aid Project No. NHPP-0008-01(143) / 107863301 in Harrison County.

Q1. Is there any required mandatory pre-bid meeting for Call 02?

A1. No.

Q2. Is there an estimate for the square footage that requires painting?

A2. Yes. Please refer to the Abrasive Blasting Notes on Sheet Number 8002 of the plans.

Q3. Should there be electrical drawings showing the intersection and where to install the type 1 box, conduit and wire?

A3. See Note 5 on SQ-1 of the plans. Assemblies to be installed as near as possible to the location of the existing assemblies.

Q4. The project plans indicate that the painting quantity is 36,450 SF which appears to be low. Please review and provide correct quantity.

A4. Bidders are advised to bid the quantity shown in the plans.

Q5. The square footage of 36,450 for the cleaning & painting shown on sheet no. 8002 in the contract plans does not appear to be accurate. We believe the square footage to be closer to 80,000. Please advise.

A5. See Answer #4.

Q6. As this project has several major items of work that must be performed by different contractors, we would like to request the bridge painting be listed as a specialty item of work. This requires specialized equipment and certifications and can only be performed by a licensed bridge painter.

A6. See addendum.
