

Call 02 Overlay approximately 1.4 miles on US 90 from the Biloxi Bay Bridge to Vermont Avenue, known as Federal Aid Project No. NH-0003-01(202) / 108234301 in Jackson County.

- Q1. Normally an ATR site requires installing new conduits, pull boxes, etc. This site has 2 pull boxes located on the North and South Side of Hwy 90. The South pull box is inside a 10' wide concrete side walk used by pedestrians to walk the bridge. We would like to know if the Contractor could reuse all existing conduits and pull boxes at this site?
- A1. The Contractor will be allowed to reuse existing conduits and pull boxes provided they are not found to be damaged upon commencement of the ATR installation.
