

**Call 19 Mill & Overlay approximately 8 miles on SR 15 from Decatur to Henry Mack Smith Road, known as State Project No. MP-5015-51(021) / 307480301 in Newton County.**

Q1. On guard rail requires 2' behind guard rail in several areas there is not enough room to get the 2' or to even install the required asphalt. How will this be addressed? Will borrow be required to widen the shoulder to fit the rail & posts?

A1. ~~The pavement width behind the guardrail may be adjusted as needed to fit existing field conditions as directed by the Project Engineer. It is not anticipated that borrow material will be needed.~~

**Revised Answer:** The Department is in the process of driving sheet piles and building a shoulder in the area where guardrail will be placed. Upon completion, the area should be suitable for paving and guardrail placement.
