**CODE: (IS)**

**DATE: 01/14/2020**

**SUBJECT: MASH Compliant Devices**

Bidders are hereby advised that compliance associated with the requirements of meeting either the National Cooperative Highway Research Program (NCHRP) Report 350 or the Manual for Assessing Safety Hardware (MASH) for installations of certain traffic control devices and permanent safety hardware devices (guardrails, guardrail terminals, permanent portable barriers, cast-in-place barriers, all other permanent longitudinal barriers, crash cushions, cable barriers, cable barrier terminals, bridge rails, bridge rail transitions, all other terminals, sign supports, and all other breakaway hardware) as listed throughout the Standard Specifications and/or the Standard Drawings, or both, is now replaced with the requirements of meeting the 2016 version of MASH after December 31, 2019. This change applies to new permanent installations and to full replacements of existing installations.

At the preconstruction conference or prior to starting any work on the project, the Contractor shall submit a letter stating that the traffic control devices and permanent safety hardware devices as outlined within the paragraph above that are to be used on the project are certified to meet MASH 2016.

When a MASH 2016-compliant device does not exist for the new permanent installations and/or full replacement installations of permanent safety hardware devices, as listed above, a MASH 2009-compliant or a NCHRP 350-compliant device may be proposed by the Contractor for the project. **MISSISSIPPI DEPARTMENT OF TRANSPORTATION**

**SECTION 904 - NOTICE TO BIDDERS NO. 2273**

**CODE: (SP)**

**DATE: 02/12/2020**

**SUBJECT: Mississippi Special Fuel Tax Law**

Bidder's attention is brought to the second paragraph of Subsection 107.02 of the Standard Specifications which states that all Contractors and Subcontractors must comply with all requirements contained in the Mississippi Special Fuel Tax Law, Section 27-55-501, *et seq.* Attached are two Fact Sheets provided by the Mississippi Department of Revenue (MDOR) with additional information.

## Gasoline and Dyed Diesel Used for Non-Highway Purposes

*Mississippi provides a reduced rate for gasoline and dyed diesel used for non-highway purposes. The reduced rates are 6.44 cents per gallon and 5.75 cents per gallon of gasoline or dyed diesel. These fuels are generally taxed at 18 cents per gallon if for on road use.*

### Gasoline Used for Non-Highway Purposes

You may be entitled to a refund of 11.56 cents per gallon (making this an equivalent to a tax rate of 6.44 cents per gallon) if you desire to purchase gasoline to be used off road. The gasoline must be used for agricultural, maritime, industrial, manufacturing, domestic or non-highway purposes only.

Examples of non-highway include gasoline used in boats, golf carts, machinery used for manufacturing or farm equipment used exclusively in plowing, planting or harvesting farm products.

### Refund Gasoline User

The refund is based on the amount of gallons used. Before a refund is issued, you are required to...

1. Obtain a refund gasoline user's permit and a certificate for refund booklet from the Department of Revenue;
2. Have a storage tank marked "REFUND GASOLINE"; and,
3. Purchase the gasoline from someone who holds a refund gasoline dealer's permit.

No refund will be allowed for gasoline used in motor vehicles owned or operated by a government entity or used in Mississippi government contracts.

### Refund Gasoline Dealer

You must obtain a refund gasoline dealer's permit from the Department of Revenue before selling refund gasoline. At no time should the gasoline be delivered to a tank that is not properly marked. The gasoline must be dyed a distinctive mahogany color at the time of delivery.

The Department of Revenue may waive the dye requirement if the dye may cause damage to the equipment. The refund gasoline user is required to obtain the waiver from the Department of Revenue.

### Dyed Diesel Used for Non-Highway Purposes

Unlike gasoline, you are not required to apply for a refund if you desire to purchase dyed diesel to be used off road. Mississippi provides a reduced rate of 5.75 cents per gallon on dyed diesel used off road. Diesel used on road is subjected to 18 cents per gallon. Dyed diesel used in motor vehicles owned or operated by a government entity or used in Mississippi government contracts will be subjected to 18 cents per gallon.

### Dyed Diesel Used on the Highway

Any person who purchases, receives, acquires or uses dyed diesel for highway use will be liable to pay 18 cents per gallon and subject to a penalty in the amount of \$1000.

### Identifying Dyed Diesel

Storage facilities for dyed diesel must be plainly marked "NONHIGHWAY DIESEL FUEL" or "NONHIGHWAY KEROSENE". Retailers are also required to mark all pumps or dispensing equipment.

## Special Fuel Used on Government Contracts

### State and Local Government Contracts

Special fuel purchased, acquired or used in performing contracts with the State of Mississippi, counties, municipalities or any political subdivision is taxed at a rate of 18 cents per gallon. Special fuel includes but is not limited to the following:

- Dyed diesel fuel;
- Kerosene;
- Undyed diesel fuel; and,
- Fuel oil.

State and local government contracts include construction, reconstruction and maintenance or repairs of projects such as roads, bridges, water systems, sewer systems, buildings, drainage canals and recreational facilities. The Department of Revenue may require contractors to remit the excise tax directly to the state in lieu of paying the tax to a distributor.

### Special Fuel Direct Pay Permit

Contractors that remit the excise tax to the state will be issued a Special Fuel Direct Pay Permit. This permit relieves the distributor from collecting the tax and requires the contractor to file a monthly special fuel return. The distributor should include the contractor’s permit number on all invoices that are related to tax-free sales.

The contractor is required to furnish a surety or cash bond guaranteeing the payment of the excise tax prior to receiving the Special Fuel Direct Pay Permit. The Department of Revenue may accept a contractors tax bond if the bond covers the excise tax levied on special fuel.

### Special Fuel Distributors

If the contractor does not have a Special Fuel Direct Pay Permit, distributors are required to collect the 18 cents excise tax and remit the tax to the Department of Revenue. The additional 12.25 cents levied on special fuel (excluding undyed diesel) should be reported on schedules 5F and 5G of the special fuel return.

### Environmental Protection Fee

Special fuel distributors are required to collect the environmental protection fee even if the contractor has a Special Fuel Direct Pay Permit. The fee is levied at 4/10<sup>ths</sup> of a cent per gallon. The fee is suspended or reinstated when the trust fund has exceeded or fallen below the obligatory balance.

### Penalties

Any person who knowingly and willfully purchases untaxed fuel for use in equipment utilized on a road or highway construction site in this state is guilty of a misdemeanor and, upon conviction, shall be fined not less than \$1,000 or more than \$100,000, or imprisoned in the county jail for not more than one year, or both.

**CODE: (SP)**

**DATE: 05/04/2021**

**SUBJECT: Scope of Work**

**PROJECT: MP-7568-03(007) / 307443301 & MP-7568-57(004) / 307443302  
Amite & Pike Counties**

The contract documents do not include an official set of construction plans, but may, by reference, include some Standard Drawings or Special Drawings when so specified in a Notice to Bidders entitled “Standard Drawings.”

The work to be accomplished using the pay items and corresponding specifications set forth in the contract is the resurfacing of SR 568 in Amite and Pike Counties with a 1/2” UTAP leveling lift and a 3/4” of UTAP surface lift.

1. Segment One in Amite County is 7,381 feet long, begins on the east side of the intersection with Bankston Road (Station 575+39) and extends east 1.4 miles to the Amite/Pike County Line (Station 649+20). This segment will receive a 1/2” UTAP leveling lift followed by a 3/4” UTAP surface lift, except for 125 feet at the beginning which will be a fine-milled transition with both leveling and surface.
2. Segment Two in Pike County is 20,498 feet long, begins at the Amite/Pike County Line (Station 649+20) and extends east toward Interstate 55, ending at Station 854+18, which is approximately 1,000 feet west of the intersection with the southbound onramp of Interstate 55. This segment will receive a 1/2” UTAP leveling lift followed by a 3/4” UTAP surface lift, except for 125 feet at the end which will be a fine-milled transition with both leveling and surface.

Work on the projects shall consist of the following:

1. The Contractor shall erect and maintain construction signing, providing all signs, setting up night-time lane closures (if needed) and traffic handling devices in accordance with the Traffic Control Plan. The cost for this work is to be included in the price bid for pay item number 618-A: Maintenance of Traffic. Fluorescent orange sheeting shall be used on all construction and traffic control signs except for those designated in the standards to be black legend and border on white background.
2. Prior to resurfacing, the existing unpaved shoulders that are high shall be bladed to drain and surplus material shall be spread along the edge of the shoulders, fore-slopes or other adjacent areas as directed by the Project Engineer, cost of the work to be absorbed.
3. The Contractor shall protect all existing elements of the roadway including, but not limited to, bridges, culverts, signs, lighting, curb, curb and gutter, concrete islands and concrete driveways. The Contractor shall repair or replace any damaged elements at no cost to the Department.

4. Incidental work such as removing vegetation, shaping of shoulders, removing excess asphalt material, project clean-up and other work necessary to complete the project will not be measured separately for payment, but the cost will be absorbed in other bid items.
5. The Contractor shall fine-mill the BOP, the EOP and local road transitions to existing pavement, beginning at a depth of 1¼" where new pavement should be flush with existing pavement and tapering to zero at a distance designated by the Engineer, or 125 feet from the BOP and EOP.
6. It is the Contractor's responsibility to insure the drainage of surface water from milled areas.
7. The Contractor shall correct drainage in the location of the connector to Ferguson Road west by milling the cross-slope to drain and blading high shoulders, as shown on the intersection detail and typical sections.
8. Temporary wedges of asphalt ("paper joints") shall be placed immediately after milling, shall match the full milled width, and be maintained by the Contractor for as long as they are in place to allow the safe transition of traffic. There is no direct pay item for this work and the cost is to be absorbed. Traffic on the milled surface shall be allowed not more than seven (7) days before the new surface shall be placed.
9. The Contractor shall repair designated failed areas as directed by the Engineer. Prior to installation of leveling or surface lifts, the area to be repaired shall be fine-milled to a depth of 3½". The Contractor shall install a single compacted lift, 3½" of 19-mm, ST, asphalt.
  - a) Station 782+61 to 785+61, EB Lane, 12' wide -- Pike County
  - b) Station 825+50 to 826+50, EB Lane, 12' wide -- Pike County
10. The Contractor shall install a ½" leveling lift of UTAP on the entire roadway, filling the ruts while maintaining ½" minimum thickness outside of the ruts. Leveling will also be installed on local road turnouts.
11. The Contractor shall overlay the entire project with ¾" of UTAP, including driveway pads and local road turnouts.
12. The Contractor shall place granular material on unpaved shoulders that are low, shaping them to a uniform width and 4% cross-slope, as per the typical sections and as directed by the Engineer.
13. Temporary striping shall conform to finished stripe specifications for alignment, reflectivity, straightness and neatness. Temporary striping shall be placed for safe movement of traffic immediately after required operations remove or cover existing striping. All permanent pavement markings are to be hot thermoplastic, double drop, as per the pay item description.

ALL TRAFFIC CONTROL ITEMS SHALL BE INCLUDED IN BID FOR PAY ITEM 618-A001, MAINTENANCE OF TRAFFIC. FLUORESCENT ORANGE SHEETING SHALL BE USED ON ALL CONSTRUCTION AND TRAFFIC CONTROL SIGNS.
