

Call 14 Mill & Overlay approximately 2 miles of US 11 from McInnis Loop to the EOSM, known as State Project No. MP-6011-18(011) / 307933301 in Forrest County.

Q1. What are the paving and milling limits for the Ramps and Cloverleaf Ramps at the intersection of US 49?

A1. The ramps and cloverleafs are predominantly concrete pavements. Our intention is to stop the milling and paving at the joint where the concrete pavement begins closest to US 11.

Q2. Will the private driveways be paved back from the mainline edge of pavement 10' if there is concrete gutter present at the entrance of the drive?

A2. No. Asphalt will be tied into the concrete driveway.
