

Call 05 Mill & Overlay approximately 10 miles of SR 8 from the Grenada County Line to west of SR 9, known as State Project No. SP-0016-02(047) / 109443301 in Calhoun County.

Q1. Bridge No. 101.1 has Type F OR G bridge end sections on the off ends of the bridge. Is the intent to remove this type of bridge end and replace it, or since this is a Type A bridge curb, install bridge connectors and type A Bridge ends as the approach side are as presently? Current pay items would just change with the second option, or it will need another bridge end type added to pay items.

A1. See addendum.

Q2. Per the sequence of the Scope of Work the patching is supposed to take place after the existing roadway is milled. Also there is a seven (7) day cover up. Will it be permissible to do the patching prior to the milling?

A2. Yes.
