

Summary of Quantities Sheet (SQS) Generator

The SQS Generator is a program that allows the Summary of Quantities Sheets to be automatically generated for design plans. Access to the SQS Generator requires the following steps:

1. Communication with your LPA Coordinator that you desire access. They can confirm if you already have an account.
2. If you do not have an account, you will need to create an External Project Wise Account at the following link <http://sp.mdot.ms.gov/projectwise/Pages/projectwise.aspx>. Once the account has been verified by the MDOT Information Systems Division via the LPA Coordinator, you will receive an email with you login name and password.
3. Once you receive confirmation the account has been created, please use the following link to access projects(s) you have been given access to edit.
<https://sqsgenerator.mdot.state.ms.us/Pages/Home.aspx>
4. Please contact your LPA Coordinator if you have any questions.
