Contraflow Plans

Radio Coverage Areas

Interstates 59 and 55 Contraflow Plans

In an effort to assist the state of Louisiana, MDOT will implement contraflow (lane reversal) for both I-59 and I-55 when requested by Louisiana and approved by the Governor of Mississippi. Category III, IV or V hurricanes in the Gulf of Mexico are situations that might cause a mandatory evacuation of the greater New Orleans area. (Contraflow operations *cannot* be considered on Highway 49).

- The decision to contraflow is NOT automatic and will only be used when absolutely necessary. Citizens **should not delay** their evacuation plans in anticipation of contraflow.
- The I-59 contraflow operations would begin in Louisiana, extend into Mississippi, and end just south of Hattiesburg.
- The I-55 contraflow operations would begin in Louisiana, extend into Mississippi, and end just south of Brookhaven.
- All exits within the contraflowed sections of the interstate highways will remain open as traffic conditions allow. Law Enforcement Officers will be present to assist with traffic control.
- The shoulders of both Interstates 59 and 55 should be kept clear for emergency vehicles. Motorists needing to stop should use the next available exit.
- Hancock County residents traveling West into Louisiana on I-10 will be routed North onto I-59 at the I-10/I-12 split.
- Tune-in to Mississippi Public Broadcasting radio stations for emergency information and updated road conditions (see Radio Coverage Areas).

Hattiesburg Traffic Control

MDOT will enforce the following procedures in the Hattiesburg area to avoid severe congestion at the intersections of three major routes.

- **Northbound traffic on Hwy 49** may NOT be allowed to exit at either HwY 98 or I-59.
- **Northbound traffic on I-59** can ONLY exit at Hwy 11 (Exit 60) or West on Hardy Street/Hwy 98 (Exit 65).
- **Westbound traffic on Hwy 98** may NOT be allowed to exit onto Hwy 49, but directed to merge onto I-59 instead.
