

Call 08 Scrub Seal & Overlay approximately 6 miles of SR 27 from I-55 to the Hinds County Line, known as State Project No. SP-0054-01(071) / 109788301 in Copiah County.

- Q1. On the existing Roadway there are raised rumble thermoplastic strips on the Edge Line and Centerline throughout the project. It states in the scrub seal specifications that all Thermoplastic striping is to be removed. Is this to be absorbed and will Temporary Stripe be needed before scrub seal and paving operations begin and temporary stripe quantities be increased?
- A1. Removal of stripe will be required for the Scrub Seal and will be an absorbed item. If the Contractor elects to do this in a method that requires the existing road to be temporarily striped, that temporary stripe will be absorbed also.
