

Call 14 Bridge Repair on Old West Point Road over US 82 (Bridge No. 160.3), known as Federal Aid Project Nos. STBG-9999-01(414) / 1097303010 & 1097303011 in Lowndes County.

- Q1. Are there any cross sections for the approaches available? What type of fill material will be required to bring approaches back up to the new bridge grade?
- A1. There are no cross sections available. Typical sections for the approaches are included in the plans. Variable thickness (leveling) asphalt will be used to bring roadway up to the new bridge grade. Granular material (crushed stone) will be used for the shoulders.
