

Call 05 Bridge Repair on US 98 over I-59 (Bridge No. 149.1), known as Federal Aid Project No. NHPP-0014-02(097) / 109669301 in Lamar County.

Q1. Can MDOT please clarify whether the CFRP is uni-directional or bi-directional? The pay item references uni-directional and the minimum tensile strength requirements shown on Sheet 32 align with uni-directional, but notes on Sheet 32 reference bi-directional. Please confirm the uni-directional is correct.

A1. See Addendum 1.

Q2. Will 2 layers of uni-directional FRP wrap be accepted in lieu of bi-directional FRP wrap? The manufactures and contractors have experienced that bi-directional tends to not work well in the vertical hanging position.

A2. Bidders are advised to bid as per the Contract Documents.
