Call 08 Bridge Repair on SR 532 over Stream (Bridge No. 13.5), known as Federal Aid Project No. STBG-0209-00(007) / 110227301 in Covington County.

Q1. **1.)** NTB 8260 has working restriction for bat torpor with no activities to the existing bridge between Dec 15 - Feb 15. Will the necessary site work, sheet pile work, riprap work, etc... that is immediately adjacent to the bridge be allowed during this period? If know, could the project start date be pushed until after Feb 15. to allow us to use the full working day allowance? **2.)** This project is on a two-lane road with heavy traffic. The project only allows for the road to be fully closed for 7 calendar days. There will be work that is required to be performed under lane closures as allowed in this project. Would MDOT consider adding a bid item for Work Zone Law Enforcement to protect the public and workers during these times?

A1. **1.)** Yes. **2.)** No.
